Questions to consider:

- Does our innovation process actually bring in new ideas?
- Who isn’t in the room? What voices are missing?
- Who can we collaborate with (and how) to create partnerships and alliances to solve problems?
- How can we create innovation processes that are both inclusive and creative?
- Are we innovating to solve the most pressing problems?
- Is our technology just meeting the needs of the affluent or is it helping disadvantaged people too?
- …don’t stop questioning!
